Note - State and County Exceedance Totals:

Totals for a given year may not equal the total of individual monitor or county exceedances. If more than one monitor in a county exceeds the standard on a given date, it only counts as one exceedance day for that county.

If more than one county has an exceedance on a given date, it only counts as one exceedance day for the state.

New 8-hour ozone standard in 2008 = 0.075 ppm
